

Advanced Post Graduate Diploma in Clinical Research & Pharmacovigilance

The objective of this program is to provide complete understanding of the clinical research and Pharmacovigilance process and to provide working knowledge to the students, which would enable them to work in the industry with minimal training.

In the first phase we would provide a comprehensive practical knowledge to the clinical research processes, drug development process, regulatory affairs, essential documentation, roles and responsibilities, ethics, monitoring, conduct and management of trials and various other related issues.

In the second phase extensive training on Pharmacovigilance (PV) is provided. Pharmacovigilance is the science of collecting, monitoring, researching, assessing and evaluating information from healthcare providers and patients on the adverse effects of medications, biological products, herbals and traditional medicines.
