[**REGISTER ONLINE**](#)

India is now an integral part of the global economy and needs managers with global skills and perspective. In this highly competitive business world you need skill sets which are in line with the needs of the industry and should be able to give you long term career, whether through job or through entrepreneurship. India needs over 50,000 health sciences professionals in the next 2 – 3 years.

There are thousands of MBA, M.Sc. and M.Pharm and other post graduate programs, which may provide you with recognized degree but are directionless, created with standard old curriculums, do not provide any industry specific skill set to students, bad content. In most cases they produce general run of the mill professionals with no or very little industry linkages minimum industry orientation. Our students need now global perspective. In order to meet the ever growing needs of the life sciences, pharmaceutical, healthcare, and clinical research industry, ***Cliniminds is launching the Admission for the 2013/14 batch for Advanced Post Graduate Diploma in Health Sciences Business Management.***

Seminar Objective

When it comes to making right career choices, students are often found to be confused about what to do and what not. Earlier this decision was determined by the parents as per their aspirations. However, with the changing landscape of businesses, development of new areas, availability of several options, growth of new professional science domains and tough competition in the job market, things have become more complicated than they used to be.

In order to discuss the career choices, provide guidance and discuss at length the career in health sciences domain, Cliniminds is conducting a free seminar at Cliniminds NOIDA Sector-2 (Near Sector 15 Metro Station).
